# Foresight

Foresight is the process of developing a **range of views** of possible ways in which the future could develop and understanding these sufficiently well to be able to decide **what decisions can be taken today** to create the best possible tomorrow.

# Conclusions

- **Foresight provides major insights into future possibilities, thereby providing a sound basis for taking action now.**
- **Some Game Changers:**
  - Implications of demographics
  - Community action, e.g. centres, labelling, regulations
  - Experiential learning to affect behaviour
  - Expert systems
